

METALSMITHING WORKSHOP: BENCH and SOLDERING TIPS SUMMER 2021

August 17 & 24 1:00 – 4:00

Cost: \$120. Lab Fee: \$10.

This class is meant as a renew and reset for those of you who would like to work more organized and more efficiently. The class will cover lots of information and many tips for jewelry makers to make working more pleasurable.

- We will cover organizing your workspace: the best tools to have on your bench: torches, hand tools, files, emery paper and equipment for different types of fabricating techniques and soldering procedures.
- We will address soldering concerns: types of solders, flux and techniques and tips for soldering successes. I will demo several soldering situations using different metals.
- We will trouble shoot individual students' projects, questions and concerns about soldering and finishing, etc. There will be some time to resolve these problems in class and ample information for conquering further problems in the future.
